WILDLIFE EXCLUSION SERVICES: Sealing & Critter-Proofing	this service involves going along the entire perimeter of the home or building using animal-proof material (metal) and applying it in the areas that we feel pose a risk for wildlife entry. The following line items are included in your exclusion services.	1
--- Construction Gap - 1st Level	The construction gap or builder gap is the most common entry point for critters. It is a gap that exists behind gutters and under shingles. Unlike many others, we do not buy prefabricated bent metal we opt to custom cut & bend the metal to fit your specific gap. We fasten the metal under the shingles and either into the gutter or behind the gutters in a manner which would keep the critters from gaining access. This line item accounts for the linear feet of the lowest 1st level.	72
--- Construction Gap - 2nd Level	The construction gap or builder gap is the most common entry point for critters. It is a gap that exists behind gutters and under shingles. Unlike many others, we do not buy prefabricated bent metal we opt to custom cut & bend the metal to fit your specific gap. We fasten the metal under the shingles and either into the gutter or behind the gutters in a manner which would keep the critters from gaining access. This line item accounts for the linear feet of the gap on the 2nd level.	33
--- Pipe Chase	this is a gap around a pipe or utility entry which needs to be sealed using critter-proof methods and materials.	2
--- Soffit Returns / Soffit Junctions	the soffit returns/junctions are sealed with animal-proof material to keep critters from gaining access.	2
EXCLUSION WARRANTY: FREE Five Year (5) Warranty	We offer a FREE No-Nonsense Five (5) Year Warranty. Our warranty, like most others, guarantees nothing will get past our work. This simply means we only warranty the areas that we sealed. We sealed the current entry points and the common backup entry points for all critters.	1
